## Overview of the SmartBoard Control Panel

Click on the SmartBoard Tools icon that you added to your dock. This will open the SmartBoard Tools and in the top left corner click on “Smart Board Tools” and choose “Open Control Panel.” (see image on right)

### Using the Control Panel with your Airliner

The control panel allows you to configure a variety of software and hardware options. One of the main features is customizing your pen color, pen size, and setting the two buttons at the top of your airliner. The two buttons at the top of your airliner can be programmed to open programs, open tools, or create any shortcuts you may desire!
