## Overview of the SmartBoard Spotlight Feature

Click on the SmartBoard Tools icon that you added to your dock. This will open the SmartBoard Tools and in the top left corner click on “Smart Board Tools” and choose “Open Spotlight.” (see image on right)

### Using the Spotlight function with your Airliner

The spotlight feature allows you to highlight an area of your screen. By selecting the **Menu** button you can change the shape of your spotlight, set the transparency level of the shaded area or exit the Spotlight view. Below is a picture of how spotlight was used to emphasize the pop kit track in GarageBand.
